JOIN US FOR PICS-AICS 2019!

SEPTEMBER 4-7, 2019

at the Marriott Marquis San Diego Marina

Preparations are underway for PICS-AICS 2019. The symposium will focus on the latest interventional catheter strategies for congenital and structural heart disease in children and adults. There will be daily live case demonstrations from catheterization laboratories from several centers around the world. Cases will include the latest technologies in devices, implantable valves, stents, balloons and more. There will be special didactic sessions including closure of all types of septal defects, percutaneous valve implantation/repair, stents, hybrid techniques, LAA Closure and much more. There will be debates between surgeons and cardiologists; oral and poster abstract presentations, and My Nightmare Case in the Cath Lab! We are expecting 800-1000 attendees.

The target audience is Pediatric Cardiologists, Adult Cardiologists who care for adults with CHD, healthcare professionals with in interest in the care of children and adults with structural and CHD.

DIRECTOR EMERITUS

William Hellenbrand, MD

Yale University Medical Center
New Haven, CT

EDUCATIONAL AND CONFERENCE OBJECTIVES

PICS-AICS 2019 will provide physicians, nurses & technologists the opportunity to learn about many aspects of pediatric and adult congenital and structural interventional cardiology.

LEARNING OBJECTIVES

Upon completion of your participation in this educational activity you intend to incorporate the following into your practice of medicine:

- Utilize new interventional technologies and current strategies developed for the management of children and adults with congenital and structural heart disease.
- Incorporate into your practice the techniques for the proper placement of percutaneous valves, stents and devices for occlusion of septal defects.
- Initiate advances in diagnosis, evaluation and therapies for children and adults with congenital and heart disease.
- Identify the important factors which affect the long-term outcomes and quality of life in children and adults with congenital heart disease.
- Incorporate alternative management strategies to transcatheter management for patients with congenital and structural heart defects.
- Utilize new clinical research advances in the care of children and adults with congenital heart disease.
- Incorporate demonstrated practical techniques related to interventional cardiac therapies in patients with structural and congenital heart disease.
- Access the results of new research, and assess their potential applications to clinical practice.
- Improve basic knowledge and skills relevant to clinical practice.
- Assess the potential of technological innovations and advances to enhance clinical practice and problem solving.
